2012 Cornell Landscape Webinar Series for Professionals: Detection and Management of Brown Marmorated Stink Bug (BMSB) & Emerald Ash Borer (EAB)

A program designed to update green industry professionals about the early detection and integrated management of the Emerald Ash Borer (EAB) and Brown Marmorated Stink Bug (BMSB) – invasive insects of importance that are moving north through New York State.

Date/Location Information:

Monday February 27, 2012 from 5:15 PM – 7:45 PM
Cornell Cooperative Extension of Jefferson County
203 North Hamilton St., Watertown, NY 13601

Program Content:

**Brown Marmorated Stink Bug (BMSB) Identification and Management.*

Cornell University Entomologist and BMSB Specialist Peter Jentsch will outline the arrival, ID and management of Brown Marmorated Stink Bug and what it means for landscape professionals.

**Emerald Ash Borer (EAB) Natural History, Detection and Community Action Plan.*

Cornell University Entomologist and EAB Specialist Mark Whitmore will discuss the ID and Natural History of EAB and what your community can do to prepare for this pending pest.
